

Thank you for purchasing  
the Lawnifi™

# Summer Box

---

Lawnifi is a liquid fertilizer program powered by Catalyst Technology. For optimal results, feed your lawn monthly during the active growing season (spring, summer, fall). Simply attach a hose to the sprayer top and apply evenly to your lawn.

**The Spring Fertilizer Box includes:**

**1 BOTTLE OF MAINTAIN**

**2 BOTTLES OF RECOVER**

The Summer Fertilizer Box is the best summer fertilizer program for your lawn. At the start of summer, use Maintain to provide the optimal balance of nutrients as temperatures start to rise. In mid-summer, and again in late-summer, apply an application of Recover to help your lawn get through the dog day stress of summer. Lawnifi's patented nano-fertilizers with Catalyst Technology promote a healthy lawn with nutrients designed to beat the summer heat.

Throughout the seasons, the nutritional needs of your lawn vary as temperatures, soil conditions, and other environmental demands change. Please refer to the application schedule below.

Make the first application of **MAINTAIN** any time in the first few weeks of summer.

Apply the second application of **RECOVER** four weeks following your initial application.

Four weeks following your last application, apply **RECOVER** before beginning your fall fertilizer maintenance program.
