

Thank you for purchasing  
the Lawnifi™

# Fall Box

---

Lawnifi is a liquid fertilizer program powered by Catalyst Technology. For optimal results, feed your lawn monthly during the active growing season (spring, summer, fall). Simply attach a hose to the sprayer top and apply evenly to your lawn.

**The Fall Fertilizer Box includes:**

**1 BOTTLE OF BOOST**

**1 BOTTLE MAINTAIN**

**1 BOTTLE RECOVER**

In early fall, apply Boost to revitalize the green leaf blade color after the heat stress of summer. The rapid green-up of your lawn will last from the time of application through the remainder of the growing season because of Boost's time release formula. In mid-fall, apply Maintain for well-balanced nutrition. In late fall, apply Recover to prepare your lawn for winter dormancy by delivering the appropriate nutrients at the right time.

Throughout the seasons, the nutritional needs of your lawn vary as temperatures, soil conditions, and other environmental demands change. Please refer to the application schedule below.

Apply **BOOST** early-fall to green up your lawn after the heat of summer.

Apply **MAINTAIN** mid-fall for color retention and to fortify the root system.

Apply **RECOVER** late-fall to prepare your lawn for the stress of winter dormancy.
